About Me

To pursue a challenging career and be a part of a progressive organization that gives me a scope to enhance my knowledge and utilise my skills for the growth of the organization.

Projects

Bank Management (APRIL 2019)

- It is a fully functional web application that uses JavaScript, HTML, CSS, Bootstrap, and PHP with the MYSQL database.
- It can add, delete or send money by entering beneficiary information. They can also log in and check their own profile.

Food Ordering System (MAY 2021)

- The system is developed using NetBeans IDE, along with the SQLite database connectivity.
- Users can select different types of items they want and the app will automatically calculate the amount as per the items.
